

CAPABILITY STATEMENT

Ultra Armor has created the world's only military-grade, soft-sided bags, cases, and containers (portable SCIFs) that block all radiofrequency signals up to 90 GHz for ultimate cybersecurity and privacy protection for electronic devices.

Ultra Armor is the world's best solution against Electromagnetic pulse (EMP) and radiofrequency cyberattacks, by ensuring complete wireless signal attenuation. This includes 1G-5G, GPS, UTS, Solar Storm, WiFi, Bluetooth, RFID, UHF, VHF, SAT, HF, microwaves, radio waves, and all electromagnetic and radio-frequency interference (EMI/RFI).

Ultra Armor's Faraday Shielding Technology provides the highest level of protection from classified and sensitive data destruction, theft, disruption, monitoring, manipulation, and interference with electronic hardware.

American Made solutions accommodates laptops up to 14.5", tablets, cell phones, military communication equipment/devices, portable power generators, and all other electronic devices. Custom products are available.

DIFFERENTIATORS

- Independent Testing & Validation
- Blocks all signals with 60-80 dB average attenuation up to 90 GHz
- Optional water-resistant exterior
- A sophisticated closure system for ultimate security and signal blockage
- Size variants for laptops, tablets, cell phones, military communication equipment, portable power generators, etc.

CORE COMPETENCIES

- Electromagnetic Pulse Protection (EMP)
- Electromagnetic interference (EMI)
- Radio-frequency interference (RFI)
- Solar Storm Protection
- Radiation Protection Clothing and Materials
